NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: GENERAL INFORMATION

s.a. D'Ieteren n.v. (the Company or the Parent) is a public company incorporated and domiciled in Belgium, whose controlling shareholders are listed in note 29. The address of the Company's registered office is:

Rue du Mail 50
B-1050 Brussels

The Company and its subsidiaries (together the Group) form an international group, active in three sectors of services to the motorist:

- Automobile distribution in Belgium of Volkswagen, Audi, Seat, Skoda, Bentley, Lamborghini, Porsche, Yamaha and MBK;
- Short-term car rental in Europe, Africa, the Middle East and Asia through Avis Europe plc and the Avis and Budget brands;
- Vehicle glass repair and replacement in Europe, North and South America, Australia and New Zealand through Belron s.a. and notably its CARGLASS® and AUTOGLASS® brands.

The Group is present in 110 countries on 5 continents.

The Company is listed on Euronext.

These consolidated financial statements have been approved for issue by the Board of Directors on 27 February 2007.

The owners of the Company have the power to amend the consolidated financial statements after issue at the Annual General Meeting of Shareholders, which will be held on 31 May 2007.

NOTE 2: ACCOUNTING POLICIES

Note 2.1: Basis of Preparation

These 2006 consolidated financial statements are for the 12 months ended 31 December 2006. They have been prepared in accordance with the International Financial Reporting Standards ("IFRS") and the related International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective, or issued and early adopted as at 31 December 2006 which have been adopted by the European Union ("EU"). They correspond to the standards and interpretations issued by the International Accounting Standards Board ("IASB") and effective as at 31 December 2006, since the elements of IAS 39 "carved out" by the EU are not applicable to the Group.

The policies set out below have been consistently applied to all the periods presented since the comparative data were restated to reflect the revised IAS 21 "The Effects of Changes in Foreign Exchange Rates" (see below).

These consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, and financial assets and liabilities held for trading (including derivative instruments) at fair value through profit or loss.

These consolidated financial statements are prepared on an accruals basis and on the assumption that the Group is a going concern and will continue in operation for the foreseeable future.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. If in the future such estimates and assumptions, which are based on management's best judgement at the date of the financial statements, deviate from the actual circumstances, the original estimates and assumptions will be modified as appropriate in the period in which the circumstances change. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in the relevant notes.

A summary of significant accounting policies is provided in note 2.2. The only significant accounting policy amended in 2006 is related to IAS 21 "The Effects of Change in Foreign Exchange Rates". The paragraphs added or amended in December 2005 became retrospectively applicable on 1 January 2006 following endorsement by the EU in May 2006. IAS 21 revised states that the net investment definition includes loans between sister companies, and requires certain inter-company items denominated in any currency to be included within net investment in a foreign operation. The application of the requirements of IAS 21 revised has resulted in the reclassification of foreign exchange movements on certain inter-company debt balances from the consolidated income statement to the consolidated statement of recognised income and expense. This reclassification concerns the Car Rental segment. Comparative amounts have been restated accordingly. The comparative amounts in respect of foreign exchange on debt recognised in the consolidated income statement have been reduced with a corresponding increase in the amount recorded in the consolidated statement of recognised income and expense. These restatements did not affect the capital and reserves attributable to equity holders. For the year ended 31 December 2005, in the Car Rental segment, the restatement reduced the foreign exchange result on debt recognised in the consolidated income statement (presented as unusual items and re-measurements in net finance costs) from a gain of EUR 9.6 million to a loss of EUR 0.1 million with a corresponding reduction in the tax charge related to unusual items and re-measurements from EUR 4.2 million to EUR 1.3 million. The net effect of these restatements on the result for the period amounts to a reduction of EUR 6.8 million (a reduction of EUR 4.1 million for the result for the period attributable to equity holders of the Parent).

NOTE 2: ACCOUNTING POLICIES (continued)

Certain new standards, amendments and interpretations to existing standards have been published that are mandatory for the Group's accounting periods beginning on or after 1 January 2007 or later periods but which the Group has not early adopted, as follows:

- IFRS 7 "Financial Instruments: Disclosures" and amendment to IAS 1 "Presentation of Financial Statements – Capital Disclosures" (effective 1 January 2007);
- IFRS 8 "Operating Segments" (effective 1 January 2009, subject to endorsement by the EU);
- IFRIC 7 "Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies" (this interpretation is not relevant to the Group);
- IFRIC 8 "Scope of IFRS 2" (effective 1 January 2007);
- IFRIC 9 "Reassessment of Embedded Derivatives" (effective 1 January 2007);
- IFRIC 10 "Interim Financial Reporting and Impairment" (effective 1 January 2007);
- IFRIC 11 "IFRS 2 - Group and Treasury Share Transactions" (effective 1 March 2007, subject to endorsement by the EU);
- IFRIC 12 "Service Concession Arrangements" (effective 1 January 2008, subject to endorsement by the EU).

The Group is currently assessing the impact of the new standards, interpretations, and amendments listed above.

Note 2.2: Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

The estimates of amounts reported in the interim financial reporting have not been changed significantly during the final interim period of the financial year.

Principles of Consolidation

Subsidiary undertakings

Subsidiary undertakings, which are those entities in which the Group has, directly or indirectly, an interest of more than half of the voting rights or otherwise has the power to exercise control over the operations are consolidated. Subsidiaries are consolidated from the date that control is transferred to the Group, and are no longer consolidated from the date that control ceases. All inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated upon consolidation.

Associated undertakings

Investments in associated undertakings are accounted for using the equity method. These are undertakings over which the Group generally has between 20% and 50% of the voting rights, or over which the Group has significant influence, but which it does not control. Unrealised gains on transactions between the Group and its associated undertakings are eliminated to the extent of the Group's interest in the associated undertakings; unrealised losses are also eliminated. The Group's investment in associated undertakings includes goodwill on acquisition. Equity accounting is discontinued when the carrying amount of the investment in an associated undertaking reaches zero, unless the Group has incurred obligations or guaranteed obligations in respect of the associated undertaking.

Interests in joint ventures

Interests in jointly controlled entities are recognised using the equity method. The above principles regarding associated undertakings are also applicable to joint ventures.

Foreign Currency Translation

The Group consolidation is prepared in euro. Income statements of foreign operations are translated into euro at the weighted average exchange rates for the period and balance sheets are translated into euro at the exchange rate ruling on the balance sheet date. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as local currency assets and liabilities of the foreign entity and are translated at the closing rate.

Foreign currency transactions are accounted for at the exchange rate prevailing at the date of the transaction. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Exchange movements arising from the retranslation at closing rates of the Group's net investment in subsidiaries, joint ventures and associates are taken to the translation reserve. The Group's net investment includes the Group's share of net assets of subsidiaries, joint ventures and associates, and certain inter-company loans. The net investment definition includes loans between "sister" companies and certain inter-company items denominated in any currency. Other exchange movements are taken to the income statement.

Where the Group hedges net investments in foreign operations, the gains and losses relating to the effective portion of the hedging instrument are recognised in the translation reserve in equity. The gain or loss relating to any ineffective portion is recognised in the income statement. Gains and losses accumulated in equity are included in the income statement when the foreign operation is disposed of.

NOTE 2: ACCOUNTING POLICIES (continued)

Goodwill

Business combinations are accounted for by applying the purchase method. The excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised in accordance with IFRS 3 constitutes goodwill, and is recognised as an asset. In case this excess is negative, it is recognised immediately in the income statement. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

Intangible Assets

An item of intangible assets is valued at its cost less any accumulated amortisation and any accumulated impairment losses.

Generally, costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred. However, costs that are directly associated with identifiable and unique software products controlled by the Group which have probable economic benefits exceeding the cost beyond one year, are recognised as intangible assets.

Intangible assets with a finite useful life are amortised over their useful life in accordance with the following methods:

- Computer software programmes: straight-line method over 2 to 7 years.
- Avis licence rights: straight-line method until 2036 (the licenses being held until that year).

The brands CARGLASS® and AUTOGLASS®, acquired in 1999, as well as ELITE AUTO GLASS™, GLASPRO™, SPEEDY GLASS®, APPLE AUTO GLASS®, WINDSHIELD PROSTM and AUTO GLASS SPECIALISTS™ acquired in 2005, have indefinite useful lives, since there is no foreseeable limit to the period over which these assets are expected to generate net cash inflows for the Group. They are therefore not amortised but tested for impairment annually.

For any intangible asset with a definite or indefinite useful life, where an indication of impairment exists, its carrying amount is assessed and written down immediately to its recoverable amount.

Research and Development

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following are demonstrated:

- (a) the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- (b) the Group has the intention to complete the intangible asset and use or sell it;
- (c) the Group has ability to use or sell the intangible asset;
- (d) how the intangible asset will generate probable future economic benefits;
- (e) the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset;
- (f) the Group has the ability to measure reliably the expenditure attributable to the intangible asset during its development.

Property, Plant and Equipment

An item of property, plant and equipment is initially measured at cost. This cost comprises its purchase price (including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates), plus any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating. If applicable, the initial estimate of the cost of dismantling and removing the item and restoring the site is also included in the cost of the item. After initial recognition, the item is carried at its cost less any accumulated depreciation and any accumulated impairment losses. The depreciable amount of the item is allocated according to the straight-line method over its useful life.

The main depreciation periods are the following:

- Buildings: 40 to 50 years;
- Plant and equipment: 3 to 15 years;
- IT equipment: 2 to 7 years;
- Leased assets: depending on the length of the lease.

Straight-line depreciation on the vehicle fleet is based on the acquisition costs of the vehicles, estimates of their future residual values, and expected holding periods.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Leases

Operating leases for which the Group is the lessor

Assets leased out under operating leases (other than vehicles sold under buy-back agreements) are included in property, plant and equipment in the balance sheet. They are depreciated over their expected useful lives. Rental income is recognised on a straight-line basis over the lease term.

NOTE 2: ACCOUNTING POLICIES (continued)

Operating leases for which the Group is the lessee

Lease payments under operating leases are recognised as expenses in the income statement on a straight-line basis over the lease term.

Finance leases for which the Group is the lessee

Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the leased property or the present value of the minimum lease payments. Each lease payment is allocated between the liability and the finance charge so as to achieve a constant rate of return on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in borrowings. The interest element of the finance cost is charged to the income statement over the lease period. The leased assets are depreciated over their expected useful lives on a basis consistent with similar owned property, plant and equipment. If there is no reasonable certainty that ownership will be acquired by the end of the lease term, the asset is depreciated over the shorter of the lease term and its useful life.

Vehicles sold under buy-back agreements

Vehicles sold under buy-back agreements are accounted for as operating leases (lessor accounting), and are presented in the balance sheet under inventories. The difference between the sale price and the repurchase price (buy-back obligation) is considered as deferred income, while buy-back obligations are recognised in trade payables.

Vehicles purchased under buy-back agreements

Vehicles purchased under buy-back agreements are not recognised as assets since these arrangements are accounted for as operating leases (lessee accounting). The difference between the purchase price and the resale price (buy-back obligation of the supplier) is considered as deferred expense, while a trade receivable is recognised for the resale price.

Investment Properties

Investment properties are measured at cost less accumulated depreciation and accumulated impairment losses.

Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their location and condition at the balance sheet date. Items that are not interchangeable, like new vehicles and second-hand vehicles, are valued using specific identification of their individual costs. Other items are valued using the first in, first out or weighted average cost formula. When inventories are used, the carrying amount of those inventories are recognised as an expense in the period in which the related revenue is recognised. Losses and write-downs of inventories are recognised in the period in which they occur. Reversal of a write-down is recognised as a credit to cost of sales in the period in which the reversal occurs.

Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term (maximum 3 months), highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Equity

Where the Company (or its subsidiaries) reacquires its own equity instruments, those instruments are deducted from equity as treasury shares. Where such equity instruments are subsequently sold, any consideration received is recognised in equity.

Dividends to holders of equity instruments proposed or declared after the balance sheet date are not recognised as a liability at the balance sheet date; they are presented in equity.

Provisions

A provision is recognised when:

- there is a present obligation (legal or constructive) as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

If these conditions are not met, no provision is recognised.

Post-employment Employee Benefits

The Group has various defined benefit pension plans and defined contribution pension plans. Most of these plans are funded schemes, i.e. they are financed through a pension fund or an external insurance policy. The minimum funding level of these schemes is defined by national rules.

Payments to *defined contribution pension plans* are charged as an expense as they fall due.

NOTE 2: ACCOUNTING POLICIES (continued)

The Group's commitments under *defined benefit pension plans*, and the related costs, are valued using the "projected unit credit method", with actuarial valuations being carried out at least on a yearly basis. Actuarial gains and losses are recognised in full in the period in which they occur. They are recognised outside the income statement, and are presented in the statement of recognised income and expense. Past service cost is recognised immediately to the extent that the benefits have already vested, and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

The long-term employee benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligations as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of any refunds and reductions in future contributions to the plan.

Financial Instruments Excluding Derivatives

IAS 32 and 39 are applied to measure financial instruments:

- (a) Available-for-sale financial assets are measured at fair value through equity. Impairment losses are recorded in the income statement.
- (b) The carrying amount of treasury shares is deducted from equity.
- (c) Trade and other receivables are measured at their amortised cost using the effective interest method, as reduced by appropriate allowances for irrecoverable amounts.
- (d) Financial assets held for trading are measured at fair value.
- (e) Trade and other payables, as well as borrowings, are measured at amortised cost using the effective interest method.

Financial Instruments – Derivatives

Derivatives are used as hedges in the financing and financial risk management of the Group.

IAS 32 and IAS 39 are applied. The Group's activities expose it to the financial risks of changes in foreign currency exchange rates and interest rates. The Group uses foreign exchange forward contracts, interest rate swaps, cross currency interest rate swaps, and options to hedge these exposures. The Group does not use derivatives for speculative purposes. However, certain financial derivative transactions, while constituting effective economic hedges, do not qualify for hedge accounting under the specific rules in IAS 39.

Derivatives are recorded initially at fair value. Unless accounted for as hedges, they are classified as held for trading and are subsequently measured at fair value.

Changes in fair value of derivatives that do not qualify for hedge accounting are recognised in the income statement as they arise.

Changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cash flows are recognised directly in equity and any ineffective portion is recognised immediately in the income statement. If the cash flow hedge is a firm commitment or the forecasted transaction results in the recognition of an asset or a liability, then, at the time the asset or liability is recognised, the associated gains or losses on the derivative that had previously been recognised in equity are included in the initial measurement of the asset or liability. For hedges that do not result in the recognition of an asset or a liability, amounts deferred in equity are recognised in the income statement in the same period in which the hedged item affects net profit or loss.

For an effective hedge of an exposure to changes in the fair value, the hedged item is adjusted for changes in fair value attributable to the risk being hedged with a corresponding entry in profit or loss. Gains or losses from re-measuring the derivative, or for non-derivatives the foreign currency component of its carrying amount, are recognised in profit or loss.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss recognised in equity is transferred to profit or loss in accordance with IAS 39.

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts, and the host contracts are not carried at fair value with unrealised gains or losses reported in income statement.

Put Options Granted to Minority Shareholders

The Group is committed to acquiring the minority shareholdings owned by third parties in Belron, should these third parties wish to exercise their put options. IAS 32 requires that the exercise price of such options granted to minority interests be reflected as a financial liability in the consolidated balance sheet. As of today, there remains some uncertainty regarding the treatment of the difference between the exercise price of the options (reflected in the financial liabilities) and the carrying value of the minority interests that must be reclassified within financial liabilities. In the absence of guidance from IFRIC, the Group has chosen to present such differences as additional goodwill. This goodwill is adjusted at period end to reflect the change in the exercise price of the options and the carrying value of minority interests to which they relate. This treatment reflects the economic substance of the transaction. However, this treatment may have to be modified if a new standard or interpretation were to suggest a different treatment.

NOTE 2: ACCOUNTING POLICIES (continued)

Revenue Recognition

Revenue from the *sale of goods* is recognised when all the following conditions have been satisfied:

- (a) the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits associated with the transaction will flow to the Group; and
- (e) the cost incurred or to be incurred in respect of transaction can be measured reliably.

When the outcome of a transaction involving the *rendering of services* can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the balance sheet date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Group;
- (c) the stage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) the cost incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest is recognised on a time proportion basis that takes into account the effective yield on the asset. *Royalties* are recognised on an accrual basis in accordance with the substance of the relevant agreement. *Dividends* are recognised when the shareholder's right to receive payment has been established.

In the income statement, sales of goods, rendering of services and royalties are presented under the heading "sales". Interest income is presented under the heading "net finance costs".

Share-Based Payments

Share-based payments are exclusively made in connection with employee stock option plans ("ESOP").

For equity-settled ESOP, IFRS 2 is not applied to shares, share options or other equity instruments that were granted before or on 7 November 2002 and which had not vested at 1 January 2004. Equity-settled ESOP granted after that date are accounted for in accordance with IFRS 2, such that their cost is recognised in the income statement over the related performance period.

All cash-settled ESOP (i.e. granted before, on, or after 7 November 2002) are recognised as liabilities, and their cost is recognised in the income statement over the related performance period.

Borrowing Costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

Government Grants

Government grants related to assets are presented in liabilities as deferred income, and amortised over the useful life of the related assets.

Income Taxes

Current taxes relating to current and prior periods are, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset. The benefit relating to a tax loss that can be carried back to recover current tax of a previous period is recognised as an asset.

Deferred taxes are provided in full using the balance sheet liability method, on temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred taxes are not calculated on the following temporary differences: (i) the initial recognition of goodwill and (ii) the initial recognition of assets and liabilities that affects neither accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the unused tax losses and credits can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

NOTE 2: ACCOUNTING POLICIES (continued)

Unusual Items and Re-measurements

Each line of the income statement, and each subtotal of the segment income statement, is broken down in order to provide information on the current result and on unusual items and re-measurements. Unusual items and re-measurements comprise the following items:

- (a) Recognised fair value gains and losses on financial instruments, excluding the accrued cash flows that occur under the Group's hedging arrangements, where hedge accounting is unable to be applied under IAS 39.
- (b) Exchange gains and losses arising upon the translation of foreign currency borrowings at the closing rate.
- (c) Impairment of goodwill and other non-current assets.
- (d) Amortisation of the Avis licence rights.
- (e) Other unusual items. They are material items that derive from events or transactions that fall within the ordinary activities of the Group, and which individually or, if of a similar type, in aggregate, are separately disclosed by virtue of their size or incidence.

All other items are recognised as part of the current result.

NOTE 3: SEGMENT INFORMATION

Note 3.1: Basis of Segmentation

The Group's primary segment reporting format is by business segment. Reportable business segments are Automobile Distribution, Car Rental and Vehicle Glass.

The Automobile Distribution segment includes the automobile distribution activities (see note 1) as well as corporate activities. The Car Rental segment comprises Avis Europe plc and its subsidiaries, joint ventures and associates (see note 1). The Vehicle Glass segment comprises Belron s.a. and its subsidiaries (see note 1).

This segmentation is consistent with the Group's organisational and internal reporting structure.

NOTE 9: UNUSUAL ITEMS AND RE-MEASUREMENTS

Result for the Period

Current result after tax ("current PAT") consists of the reported profit from continuing operations (or the result for the period when no discontinued operation is reported), excluding unusual items and re-measurements as defined in note 2, and excluding their tax impact.

Current result before tax ("current PBT") consists of the reported result before tax excluding unusual items and re-measurements as defined in note 2.

Current PAT, Group's share, and current PBT, Group's share, exclude the share of minority shareholders in current PAT and current PBT.

NOTE 9: UNUSUAL ITEMS AND RE-MEASUREMENTS (continued)

Current result is a non-GAAP measure, i.e. its definition is not addressed by IFRS. The Group does not represent current result as an alternative to financial measures determined in accordance with IFRS. Current result as reported by the Group may differ from similarly titled measures by other companies. The Group uses the concept of current result to reflect its underlying performance.

Automobile Distribution

(a) Net finance costs include re-measurements of financial instruments amounting to EUR -3.1 million (2005: EUR -0.4 million) arising from changes in the "clean" fair value of derivatives.

Car Rental

(b) Net finance costs and commercial and administrative expenses include re-measurements of financial instruments amounting to respectively EUR -1.4 million (2005: EUR 0.9 million) and EUR 1.2 million (2005: EUR -5.3 million) arising from changes in the "clean" fair value of derivatives.

(c) Foreign exchange gain on net debt amounts to EUR 0.9 million (2005: loss of EUR 0.1 million after application of IAS 21 revised – see note 2), recognised in net finance costs.

(d) An impairment charge of EUR 0.3 million was recognised in 2006 following the acquisition during the year of several Avis licensee locations in Germany (see note 12) which have been integrated into existing operations. Given that goodwill arising in the overall German cash-generating unit had been fully provided against in previous accounting periods, an impairment provision has been recognised against the goodwill arising in 2006. This impairment provision writes down the carrying value of the associated goodwill to nil and is presented in other operating expenses. A similar impairment charge, amounting to EUR 0.5 million, was recorded in 2005 due to the acquisition of licensee locations in France (Budget) and Holland (Avis).

(e) Other unusual items of the Car Rental segment are set out below:

- Restructuring costs of EUR 25.3 million (2005: EUR 6.4 million) were incurred in the year in connection with the restructuring project Avis Europe commenced in late 2005 covering the roles of its European headquarters, corporate operations, shared service centre and call centres. These restructuring costs include redundancy costs and onerous lease provisions and are net of unusual pension curtailments of EUR 1.2 million (2005: nil). Restructuring costs of EUR 2.0 million in 2005 were also incurred in connection with the transfer of back-office functions to the Group's shared service centre in Budapest. Restructuring costs are presented in other operating expenses, pension curtailments in other operating income.

- Following Avis Europe's decision in 2004 to terminate the agreement with the principal contractor on the IT back-office project, additional termination costs of EUR 7.4 million (2005: EUR 3.6 million) have been recognised in 2006, primarily arising from the mitigating action being taken against the termination costs, which may lead to a net credit in future accounting periods. Termination costs are presented in other operating expenses.

NOTE 9: UNUSUAL ITEMS AND RE-MEASUREMENTS (continued)

- In June 2006, significant changes were made to the unfunded pension scheme in Germany resulting in an unusual credit to past service costs of EUR 3.2 million (2005: nil). This is presented in other operating income.
- During the current and prior year, the collection of credit hire receivable balances in the closed Centrus business was more successful than previously anticipated and resulted in an unusual credit (in other operating income) of EUR 0.6 million (2005: EUR 3.2 million), reflecting a partial reversal of the receivable write-offs and adjustment of reorganisation provisions made in previous years.
- In 2005, various professional, legal and consultancy costs were incurred in conjunction with Avis Europe's capital restructuring and the rights issue (see note 9 of the 2005 annual report). Where such costs were not directly attributable to the issue of new shares, or the drawing down of new debt facilities, they were recognised in the income statement as unusual items (in other operating expenses). In addition to the costs expensed by Avis Europe (EUR 4.4 million), the Group recognised a EUR 5.3 million unusual charge, representing its share in the difference between the gross and the net proceeds of the rights issue. The minority share in this difference was deducted from minority interest in equity.

Vehicle Glass

- (f) Net finance costs and cost of sales include re-measurements of financial instruments amounting to respectively EUR 2.4 million (2005: EUR 2.6 million) and EUR 0.7 million (2005: nil) arising from changes in the "clean" fair value of derivatives.
- (g) Other unusual items of the Vehicle Glass segment are set out below:
 - Unusual costs of EUR 22.3 million (in other operating expenses) were incurred in 2006 and comprise EUR 20.2 million one-off costs related to the integration and transformation programme underway in North America aimed at improving operating margins of recent acquisitions, as well as EUR 2.1 million arising from the decision to close the manufacturing operations in Australia. Restructuring costs amounted to EUR 1.7 million in 2005.
 - Significant changes were made to the funded pension scheme in Holland resulting in an unusual curtailment credit of EUR 2.6 million (2005: nil). This is presented in other operating income.
 - Other unusual items in net finance costs include realised gains on disposals of financial assets amounting to EUR 0.1 million (2005: 0.2 million).
 - In 2005, an unusual reversal (in other operating income) of EUR 2.1 million was booked to bring a provision previously set up to cover the cash settlement of the former management share option scheme in line with the amounts due, while sundry unusual items (in other operating income) amounted to EUR 0.2 million.

Cash Flows

The line "acquisition of equity instruments" includes the business combinations disclosed in note 12.

The net cash from operating activities for the period to 31 December 2005 includes the actual cash settlement of the management share option scheme of Belron, amounting to EUR 17.2 million.

In July 2005, Avis Europe plc raised EUR 166.2 million, net of expenses by way of a rights issue to qualifying shareholders. The Group subscribed its share of the capital increase, i.e. EUR 104.5 million. In the 2005 cash flow statement, only the share subscribed by minority shareholders of Avis Europe impacts the line "net proceeds from rights issue".

NOTE 10: EARNINGS PER SHARE

Earnings per share ("EPS") are shown above, on the face of the consolidated income statement.

Basic and diluted EPS are based on the profit for the period attributable to equity holders of the Parent, after adjustment for participating shares (each participating share confers one voting right and gives right to a dividend equal to one eighth of the dividend of an ordinary share). Current EPS, which do not include unusual items and re-measurements as defined in note 9, are presented to highlight underlying trading performance.

The weighted average number of ordinary shares in issue for the period is shown in the table below.

The Group has granted options to employees over ordinary shares of the Parent and of Avis Europe plc. Such shares constitute the only category of potentially dilutive ordinary shares.

The options over ordinary shares of Avis Europe did not impact earnings per share in either 2005 or 2006 as either the option exercise prices were in excess of the prevailing market share price, or exercise of the options is subject to performance conditions which had not been fully satisfied by the year end.

The options over ordinary shares of the Parent increased the weighted average number of shares of the Parent in 2005 and 2006 as some option exercise prices were below the market share price. These options are dilutive.

NOTE 10: EARNINGS PER SHARE (continued)

The computation of basic and diluted EPS is set out below:

		2006	2005 ⁽¹⁾
Result for the period attributable to equity holders		100.0	76.2
Adjustment for participating shares		-1.2	-0.9
Numerator for EPS (in EUR million)	(a)	98.8	75.3

NOTE 11: GOODWILL

in EUR million	2006	2005
Gross amount at 1 January	615.1	504.7
Accumulated impairment losses at 1 January	-43.1	-42.6
Carrying amount at 1 January	572.0	462.1
Additions	18.0	39.4
Increase arising from put options granted to minority shareholders (see note 33)	47.3	69.7
Impairment losses	-0.3	-0.5
Adjustments	10.1	1.3
Translation differences	-2.7	-
Carrying amount at 31 December	644.4	572.0
of which: gross amount	687.8	615.1
accumulated impairment losses	-43.4	-43.1

The additions arising from business combinations that occurred in the period are detailed in note 12.

The adjustments result from subsequent changes in the goodwill on the 2005 acquisitions. This goodwill was increased by EUR 10.1 million reflecting fair value adjustments made to the initial valuations disclosed in note 12 of the 2005 annual report. This increase reflects changes in the fair value of intangible assets (decrease of EUR 5.7 million), other net assets (decrease of EUR 2.5 million) and consideration (increase of EUR 1.9 million).

In accordance with the requirements of IAS 36 "Impairment of Assets", the Group completed a review of the carrying value of goodwill and of the other intangible assets with indefinite useful lives (see note 13) as at each year end. The impairment review, undertaken by calculating value in use, was carried out to ensure that the carrying value of the Group's assets are stated at no more than their recoverable amount, being the higher of fair value less costs to sell and value in use. The impairment losses of 2006 and 2005 arose in the Car Rental segment (see note 9).

NOTE 11: GOODWILL (continued)

In determining the value in use, the Group calculated the present value of the estimated future cash flows expected to arise from the continuing use of the assets using pre-tax discount rates in the range from 7% to 10% (2005: from 7% to 11%). The discount rate applied is based upon the weighted average cost of capital of each segment with appropriate adjustment for the relevant risks associated with the businesses. Estimated future cash flows are based on long-term plans (i.e. over 4 or 5 years) for each cash generating unit, with extrapolation thereafter based on long-term average growth rates for the individual cash generating units. This growth rate is in the range from 2% to 3% (2005: 2% to 3%) for most of the units, including the ones that carry the most significant goodwill and intangible assets with indefinite useful lives.

Future cash flows are estimates that are likely to be revised in future periods as underlying assumptions change. Key assumptions in supporting the value of goodwill and intangible assets with indefinite useful lives include long-term interest rates and other market data. Should the assumptions vary adversely in the future, the value in use of goodwill and intangible assets with indefinite useful lives may reduce below their carrying amounts. Based on current valuations, headroom appears to be sufficient to absorb a normal variation in the underlying assumptions.

The allocation of goodwill to cash generating units is set out below (the allocation of other intangible assets with indefinite useful lives is set out in note 13):

in EUR million	2006	2005
Automobile Distribution	0.2	0.2
Car Rental:

Denmark	0.8	0.8
Unallocated	204.7	157.5
Subtotal Vehicle Glass	636.3	564.0
GROUP	645.3	572.9

The unallocated amount in the Vehicle Glass segment comes from the acquisition of Belron by the Group in 1999, from the transactions entered into with the minority shareholders of Belron since 1999, and from the recognition of the put options granted to minority shareholders of Belron following the introduction of IAS 32 from 1 January 2005 onwards (see note 33).

NOTE 12: BUSINESS COMBINATIONS

During the period, the Group made the following acquisitions:

Car Rental

- Avis Europe acquired a 100% interest in a number of the rental locations of a former Avis licensee in Germany. The businesses, which provide vehicle rental services, were acquired with effect from the year end and cash consideration for the acquisition was paid during the year. The goodwill arising from this business combination was immediately impaired (see note 9).

Vehicle Glass

- A 100% interest in Nationwide Autoglazing Ltd and Glasscare Ltd (United Kingdom), which are a third party agent negotiating preferred supplier arrangements with insurers and referral arrangements with insurance brokers. These acquisitions were effective from 31 January 2006.
- A 100% interest in Gifford Enterprises Inc. and Rowford Express Distributors Inc, trading as Maverick Auto Glass and headquartered in Phoenix, Arizona, which operate 5 service centres in this region of the United States. This acquisition was effective from 31 March 2006.
- A 100% interest in Cristalauto Toledo S.L. which operate a branch in Spain. This acquisition was effective from 16 May 2006.
- A 100% interest in AB Alatalo & Co which operate a branch in Sweden. This acquisition was effective from 1 June 2006.
- A 100% interest in Jan Gustavsen AS which operate a branch in Norway. This acquisition was effective from 30 June 2006.
- A 100% interest in Ergofil SA which was a former franchisee fitting and wholesale business in Greece. This acquisition was effective from 1 August 2006.
- A 100% interest in Autoglaserei Brauckhoff which operate 2 branches in Germany. This acquisition was effective from 1 August 2006.
- A 100% interest in Le Salon de l'Auto R. Lebeau Ltee and 601085 British Columbia Ltd which operate 2 branches in Canada. This acquisition was effective from 3 November 2006.
- A 100% interest in Glasscar s.r.l. which operate 11 branches in Italy. This acquisition was effective from 28 December 2006.

The sales arising subsequent to these acquisitions amount to approximately EUR 15 million (approximately EUR 25 million if they had occurred on the first day of the period). The results arising subsequent to these acquisitions (even if they had occurred on the first day of the period) are not considered material to the Group and accordingly are not disclosed separately. The acquisitions have been accounted for using the acquisition method of accounting.

The details of the net assets acquired, goodwill and consideration of the acquisitions are set out below:

(1) Fair value and accounting policy adjustments.

(2) The fair values are provisional since the integration process of the acquired entities and businesses is still ongoing.

A business combination occurred in the Automobile Distribution segment after the balance sheet date but before the consolidated financial statements were authorised for issue (see note 41).

NOTE 13: OTHER INTANGIBLE ASSETS

Goodwill is analysed in note 11. All the other intangible assets have definite useful lives, unless specified otherwise.

The carrying amount of the Avis licence rights is supported by the net present value of theoretical royalty streams, based on the projected sales of the Avis network. Theoretical royalty streams are estimates that may change in future periods. The discount rate is calculated based on long-term interest rates and other market data. Should the estimates or other data adversely vary in the future, the value in use of the Avis licence rights could fall below its current carrying amount. Based on current valuations, headroom appears to be sufficient to absorb a normal variation in the underlying assumptions.

The nature of the brands with indefinite useful lives is provided in the summary of significant accounting policies in note 2. The decrease in brands reflects the fair value adjustments made to the initial valuations disclosed in note 12 of the 2005 annual report (see note 11).

At 31 December 2006, assets under construction mainly include the intangible components of the new centralised ERP system ("Bridge" - EUR 29.4 million) in the Vehicle Glass segment. The tangible components of Bridge are disclosed in note 15. The total carrying amount of Bridge is EUR 40.0 million. Amortisation started in the second half of 2005, following the successful go-live of the system in a major country. Bridge will continue to be presented as assets under construction until the completion of the first phase of the roll-out process.

NOTE 13: OTHER INTANGIBLE ASSETS (continued)

The allocation of brands (with indefinite useful lives) to cash generating units in the Vehicle Glass segment is set out below:

in EUR million	2006	2005
United Kingdom	67.9	67.9
France	61.9	61.8

<i>accumulated depreciation</i>	<i>-187.7</i>	<i>-166.6</i>

Vehicles held under finance leases are included in the above (in the Car Rental segment only) at the following amounts:

2006	EUR 119.0 million
2005	EUR 113.1 million

The Automobile Distribution's fleet is rented out in Belgium by s.a. D'leteren Lease n.v. ("D'leteren Lease"), a wholly-owned subsidiary of the Group. All rentals are operating leases. On average, the rentals are 41 months long (2005: 41 months). The average size of the fleet is as follows:

2006	18,466 vehicles
2005	17,401 vehicles

In 2006 D'leteren Lease undertook a securitisation programme of its fleet and lease contracts to achieve a more autonomous and flexible financing structure, its fleet having doubled in 6 years. This securitisation operation, which fits into the Group's strategy of diversified financing, consists of the issue of bonds to professional investors. That securitisation programme had no impact on the net debt of the Group (this programme being a substitute to other external sources of financing). An initial amount of EUR 229.5 million was raised in April 2006, covering approximately 80% of the carrying amount of the fleet of D'leteren Lease. The balance is financed by inter-company loans. The carrying amount of the bonds changes as new lease contracts are concluded and as old ones expire. The reimbursement of the bonds and the payment of interest are covered by customers' lease payments and the resale of the vehicles. The programme enables the carrying amount of the bonds to follow the evolution of the carrying amount of the fleet until the third anniversary of the initial financing. It then starts to amortise, in line with the maturation of the underlying lease contracts. The securitisation programme does not result in the derecognition of any item from the balance sheet. Other disclosures regarding the securitisation programme are provided in notes 19, 25, 31 and 39.

NOTE 14: VEHICLES (continued)

The Car Rental's fleet is rented out by Avis Europe plc and its subsidiaries in Europe. All rentals are operating leases. On average, the rentals are 6 days long (2005: 6 days). The average size of the fleet (including vehicles held under buy-back agreements and under other operating leases) is as follows:

2006	129,000 vehicles
2005	123,000 vehicles

The vehicles recognised in the balance sheet as non-current items are those that are not held under buy-back agreements. Their value at end of rental life will depend on the market for those vehicles at the time of disposal. Judgement is therefore required in the estimation of disposal value.

At 31 December 2006, assets under construction mainly include property under construction in the Automobile Distribution segment (EUR 3.6 million) and the tangible components of the new centralised ERP system ("Bridge" - EUR 10.6 million) in the Vehicle Glass segment (see note 13).

Assets held under finance leases are included in the above at the following amounts:

The fair value is supported by market evidence, and is based on a valuation by an independent valuer who holds a recognised and relevant professional qualification, and who has recent experience in the location and category of the investment property held by the Group. The latest valuations were performed in March and December 2005.

All items of investment property are located in Belgium and are held by the Automobile Distribution segment.

See also notes 5 and 39 for other disclosures on investment property.

NOTE 17: AVAILABLE-FOR-SELL FINANCIAL ASSETS

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as (i) loans and receivables, (ii) held-to-maturity investments or (iii) financial assets held for trading.

in EUR million	2006		2005	
	Carrying amount	Fair value	Carrying amount	Fair value
Sundry	1.3	1.3	1.6	1.6
Total available-for-sale financial assets	1.3	1.3	1.6	1.6

Available-for-sale financial assets primarily comprise minority interests in listed companies (measured at fair value) and non listed companies (measured at cost less accumulated impairment losses if any, being an approximation of their fair value), held by the three segments. They are considered as non-current assets, and are not expected to be realised within 12 months. However, some or all of them could be disposed of in the near future, depending on opportunities.

NOTE 18: DERIVATIVE HEDGING INSTRUMENTS

Derivative hedging instruments are derivatives that meet the strict criteria of IAS 39 for application of hedge accounting. They provide economic hedges against risks faced by the Group (see note 38).

Derivative hedging instruments are classified in the balance sheet as follows:

in EUR million	2006	2005
Current assets	1.0	-
Non-current liabilities	-42.3	-52.8
Current liabilities	-30.3	-0.4
Net derivative hedging instruments	-71.6	-53.2

Derivative hedging instruments are analysed as follows:

Cross currency interest rate swaps (debt derivatives)	-72.0	-52.8
Interest rate swaps (debt derivatives)	-0.5	-
Forward foreign exchange contracts (non-debt derivatives)	0.9	-0.4
Net derivative hedging instruments	-71.6	-53.2

All derivative hedging instruments are recognised in the Car Rental segment.

NOTE 18: DERIVATIVE HEDGING INSTRUMENTS (continued)

Cross currency interest rate swaps of aggregate notional principal amounts of USD 390.0 million (2005: USD 390.0 million) were used to hedge the Avis Europe's USD denominated loan notes. Fair value hedge adjustments of EUR 0.7 million (2005: EUR 22.3 million) arise from the hedging of the principal value of the exposures to euro denominated liabilities. Of this adjustment, EUR 0.7 million (2005: nil) relates to hedged items due for settlement within one year and EUR nil (2005: EUR 22.3 million) relates to hedged items due for settlement after one year. Cash flow hedges of EUR 7.5 million (2005: EUR 0.9 million) arise from the conversion of the regular semi-annual USD denominated interest payments to euro denominated interest payments. Amounts recognised within equity will be released to the income statement when the underlying fixed interest payments occur at various dates between the year end and 2014. There was no ineffectiveness of these hedges recorded at the balance sheet date.

Interest rate swaps of aggregate notional principal amounts of EUR 200.0 million (2005: nil) with average fixed interest payable of 4.03% were used to hedge variable quarterly interest payments arising under the Senior Floating Rate Notes due 2013 issued by Avis Europe in 2006. The aim of the hedge relationship is to transform the variable interest borrowing into a fixed interest borrowing. Credit risks do not form part of the hedge. There was no material ineffectiveness of these hedges recorded as at the balance sheet date.

The non-current portion of the derivative hedging instruments is expected to be settled after more than 12 months; the current portion within 12 months.

The fair values are determined using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on conditions at the balance sheet date. The fair value of cross currency interest rate swaps, and interest rate swaps is calculated as the present value of future estimated cash flows. The fair value of interest rate caps and collars are valued using option valuation techniques. The fair value of forward exchange contracts is determined using forward exchange market rates at the balance sheet date.

The notional principal amounts of the outstanding derivative hedging instruments are as follows:

in EUR million	2006	2005
Cross currency interest rate swaps (debt derivatives)	294.9	328.7
Interest rate swaps (debt derivatives)	200.0	-
Forward foreign exchange contracts (non-debt derivatives)	19.7	10.1

NOTE 19: DERIVATIVES HELD FOR TRADING

Derivatives held for trading are derivatives that do not meet the strict criteria of IAS 39 for application of hedge accounting. They however provide economic hedges against risks faced by the Group (see note 38).

Derivatives held for trading are classified in the balance sheet as follows:

in EUR million	2006	2005
Non-current assets		
Debt derivatives		
Embedded derivatives	6.8	-
Current assets

NET DERIVATIVES HELD FOR TRADING	8.1	-6.4

(1) Other disclosures regarding the securitisation programme are provided in notes 14, 25, 31 and 39.

NOTE 19: DERIVATIVES HELD FOR TRADING (continued)

The EUR 250.0 million Senior Floating Rate Notes due 2013 issued by Avis Europe in 2006 include a two year call option permitting Avis Europe to repay the notes with effect from 31 July 2008. Under the option, the notes may be redeemed at the following redemption prices (expressed as a percentage of principal amounts) if repaid during the 12 month period beginning on 31 July 2008: 102%; 31 July 2009: 101%; 31 July 2010 and thereafter: 100%. In accordance with IAS 39, this option is separately recognised from the underlying notes as an embedded derivative.

See note 18 for details on the valuation techniques used.

The notional principal amounts of the outstanding derivatives held for trading are as follows:

in EUR million	2006	2005
Interest rate swaps excluding securitisation swaps	925.7	1,084.8
Interest rate securitisation swaps ⁽¹⁾	555.2	-
Interest rate caps and collars	172.0	110.0
Interest rate floors	48.0	23.0
Forward rate agreements	-	40.5
Forward foreign exchange contracts and options	21.8	7.9

(1) Other disclosures regarding the securitisation programme are provided in notes 14, 25, 31 and 39.

NOTE 20: LONG-TERM EMPLOYEE BENEFIT ASSETS AND OBLIGATIONS

Long-term employee benefits include post-employment employee benefits and other long-term employee benefits. Post-employment employee benefits are analysed below. Other long-term employee benefits are presented among non-current provisions or non-current other payables, and, if material, separately disclosed in the relevant note.

Post-employment benefits are limited to retirement benefit schemes. Where applicable, Group entities contribute to the relevant state pension schemes. Certain Group entities operate schemes which provide retirement benefits, including those of the defined benefit type, which are in most cases funded by investments held outside the Group. The disclosures related to defined contribution schemes are provided in note 36.

The Group operates defined benefit schemes for qualifying employees in the following countries:

Automobile Distribution:

Funded and unfunded schemes:

Belgium

Car Rental:

Funded schemes:

Austria

France

Spain

United Kingdom

Unfunded schemes:

Germany

Greece

Italy

Vehicle Glass:

Funded schemes:

Canada

Holland

Ireland

United Kingdom

The valuations used have been based on the most recent actuarial valuations, updated by the scheme actuaries to assess the liabilities of the scheme and the market value of the scheme assets at each of the balance sheet dates.

NOTE 20: LONG-TERM EMPLOYEE BENEFIT ASSETS AND OBLIGATIONS (continued)

The main actuarial assumptions are as follows (ranges are provided given the plurality of schemes operated throughout the Group):

in EUR million	Funded schemes				Unfunded schemes			
	2006		2005		2006		2005	
	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
Inflation rate	2.0%	3.1%	2.0%	2.9%	1.6%	2.0%	1.6%	2.0%
Discount rate	4.3%	5.2%	4.2%	5.3%	3.7%	4.4%	2.9%	4.0%
Expected return on scheme assets:								
Equities	7.0%	8.5%	7.2%	8.5%	-	-	-	-
Bonds	4.0%	5.0%	4.5%	5.8%	-	-	-	-

Rate of salary increases	1.0%	5.2%	1.0%	5.0%	2.0%	3.0%	1.0%	4.0%
Rate of pension increases	2.0%	3.1%	2.0%	2.9%	1.1%	2.0%	1.6%	2.0%

The expected rates of return on scheme assets are based on market expectations at the beginning of each year, for returns over the entire life of the related obligation. The expected return on bonds is based on long-term bond yields. The expected return on equities is based on a wide range of qualitative and quantitative market analysis including consideration of market equity risk premiums.

The actual return on scheme assets is analysed as follows:

in EUR million	2006	2005
Expected return on scheme assets	19.6	15.4
Actual return less expected return on scheme assets	0.1	31.9
Actual return on scheme assets	19.7	47.3

The amounts recognised in the balance sheet are summarised as follows:

in EUR million	2006	2005
Long-term employee benefit assets	1.8	1.3
Long-term employee benefit obligations	-175.3	-190.0
Recognised net deficit (-) / surplus (+) in the schemes	-173.5	-188.7
of which: amount expected to be settled within 12 months	-1.0	-1.2
amount expected to be settled in more than 12 months	-172.5	-187.5

Actuarial gains (+) / losses (-)	-6.0	4.9	-1.1	-44.9	-8.4	-53.3

(1) Financial and/or demographic assumptions.

The best estimate of the contributions expected to be paid to the schemes during the 2007 annual period is EUR 25.5 million.

The obligation of defined benefit schemes is calculated on the basis of a set of actuarial assumptions (including among others: mortality, discount rate of future payments, salary increases, personnel turnover, etc.). Should these assumptions change in the future, the obligation may increase. The defined benefit scheme assets are invested in a diversified portfolio, with a return that is likely to experience volatility in the future. Should the return of these assets be insufficient, the deficit might increase.

NOTE 21: DEFERRED TAXES

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

The movement in deferred tax assets and liabilities during the period and the prior period is as follows:

in EUR million	Buy-back agreements	Revaluations	Depreciation amortisation write-downs	Provisions	Dividends	Tax losses available for offset	Financial instruments	Other	Total
Deferred tax liabilities (negative amounts)

At 31 December 2006, after offsetting	-	-	20.8	30.9	-	29.8	3.4	12.8	97.7
Net deferred tax assets (liabilities) after offsetting recognised in the balance sheet:									
31 December 2005	0.1	-218.0	-35.3	53.5	-0.5	22.6	2.6	-8.8	-183.8
31 December 2006	-	-211.3	-30.2	36.2	-0.3	32.2	4.3	-4.4	-173.5

The revaluation column mainly includes the deferred tax liability (EUR 200.7 million; 2005: EUR 207.4 million) arising on the recognition of the Avis licence rights.

The net deferred tax balance includes a liability of EUR 6.7 million (2005: EUR 6.7 million) that will be reversed in the following year, due to the amortisation of the Avis licence rights. It also includes net deferred tax assets amounting to EUR 3.6 million (2005: EUR 8.5 million) that are expected to be reversed in the following year. However, given the low predictability of deferred tax movements, this net amount might not be reversed as originally foreseen.

At the balance sheet date, the Group has unused tax losses of EUR 190.4 million (EUR 150.2 at 31 December 2005) available for offset against future profits, for which no deferred tax asset has been recognised, due to the unpredictability of future profit streams. This includes unused tax losses of EUR 20.3 million (2005: EUR 11.2 million) that will expire in the period 2007-2026 (2005: 2006-2025). Other losses may be carried forward indefinitely.

Deferred tax has not been recognised in respect of other deductible temporary differences amounting to EUR 49.5 million (2005: EUR 21.5 million) due to the unpredictability of future profit streams.

NOTE 21: DEFERRED TAXES (continued)

At the balance sheet date the aggregate amount of temporary differences associated with the investments in subsidiaries, branches, associates and interests in joint ventures (being mainly the accumulated positive consolidated reserves of these entities) for which deferred tax liabilities have not been recognised is EUR 927.6 million. No deferred tax liability has been recognised in respect of these differences because the Group is in a position to control the timing of the reversal of the temporary differences and it is probable that such differences will not reverse in the foreseeable future. It should also be noted that the reversal of these temporary differences, for example by way of distribution of dividends by the subsidiaries to the Parent, would generate no (or a marginal) current tax effect.

Deferred tax assets include, among other items:

- EUR 6.6 million (2005: EUR 18.1 million) of which the utilisation is dependent on future taxable profits in excess of the profit arising from the reversal of existing taxable temporary differences.
- EUR 20.4 million (2005: EUR 12.6 million) related to entities that suffered a loss in either the current or preceding period in a tax jurisdiction to which the deferred tax assets relate.

The recognition of these deferred tax assets is supported by profit expectations in the foreseeable future.

Deferred tax assets are recognised provided that there is a sufficient probability that they will be recovered in the foreseeable future. Recoverability has been conservatively assessed. However, should the conditions for this recovery not be met in the future, the current carrying amount of the deferred tax assets may be reduced.

NOTE 22: OTHER NON-CURRENT RECEIVABLES

The other non-current receivables are comprised of guarantee deposits. Their carrying amount approximates their fair value, and they generally generate no interest income. They are expected to be recovered after more than 12 months.

NOTE 23: NON-CURRENT ASSETS CLASSIFIED AS HELD FOR SALE

The major classes of assets classified as held for sale are the following ones:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Vehicles	-	8.4	-	8.4	-	11.1	-	11.1
Other property, plant and equipment	-	-	-	-	0.1	-	-	0.1
Non-current assets classified as held for sale	-	8.4	-	8.4	0.1	11.1	-	11.2

In the Car Rental segment, non-current assets held for sale comprise ex-rental vehicles where management are committed to the disposal of the vehicles. The disposals are expected to occur in early 2007.

NOTE 24: INVENTORIES

in EUR million	2006	2005
Automobile Distribution		
Vehicles	269.7	272.2

Subtotal	114.1	118.4
GROUP	418.2	422.3
<i>of which: items carried at fair value less costs to sell</i>	<i>38.9</i>	<i>33.4</i>

The items carried out at fair value less costs to sell are mainly the vehicles sold under buy-back agreements (this kind of agreement being accounted for as operating lease) that are kept on balance sheet until their subsequent resale.

The inventories are expected to be recovered within 12 months.

NOTE 25: OTHER FINANCIAL ASSETS

The other financial assets are analysed as follows:

in EUR million	2006	2005
Automobile Distribution - Securitisation cash reserves	25.5	-
Car Rental - Finance lease collateral	22.6	15.0
Vehicle Glass - Restricted cash related to deferred consideration	-	3.5
Other financial assets	48.1	18.5

The securitisation (see note 14) cash reserves are pledged by D'Ieteren Lease and are held on its own bank accounts. The set up of these reserves explains the majority of the negative cash flow from net investment in other financial assets in the Automobile Distribution segment. Other disclosures regarding the securitisation programme are provided in notes 14, 19, 31 and 39.

The other financial assets are expected to be recovered within 12 months. They attract interest with reference to EURIBID, LIBID or equivalent.

NOTE 26: CURRENT TAX ASSETS AND LIABILITIES

Current tax assets (liabilities) are largely expected to be recovered (settled) within 12 months.

NOTE 27: TRADE AND OTHER RECEIVABLES

Trade and other receivables are analysed as follows:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Trade receivables - net	95.3	153.9	134.7	383.9	102.0	131.9	125.9	359.8
Vehicle related receivables	-	1,082.4	-	1,082.4	-	1,078.7	-	1,078.7
Receivables from entities accounted for using the equity method	0.4	0.1	-	0.5	0.3	0.2	-	0.5
Other receivables	22.8	122.2	31.4	176.4	22.0	121.1	35.3	178.4
Trade and other receivables	118.5	1,358.6	166.1	1,643.2	124.3	1,331.9	161.2	1,617.4

The trade and other receivables are expected to be recovered within 12 months. Their carrying amount approximates to their fair value, and they generate no interest income.

In the Car Rental segment, vehicle related receivables include receivables related to vehicles purchased under buy-back agreements, prepaid vehicle operating lease charges, amounts due from leasing companies and other vehicle receivables. Credit risk is concentrated with the main European vehicle manufacturers.

Concentrations of credit risk with respect to non-vehicle related receivables are limited due to the diversity of the Group's customer base. Balance sheet amounts are stated net of provisions for doubtful debts, and accordingly, the maximum credit risk exposure is the carrying amount of the receivables in the balance sheet.

NOTE 28: CASH AND CASH EQUIVALENTS

Cash and cash equivalents are analysed below:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Cash at bank and in hand	1.5	52.0	37.8	91.3	1.4	79.0	18.5	98.9
Short-term deposits	-	64.6	-	64.6	-	19.8	-	19.8
Cash and cash equivalents	1.5	116.6	37.8	155.9	1.4	98.8	18.5	118.7

Cash and cash equivalents are mainly floating rate assets which earn interest at various rates set with reference to the prevailing EURIBID, LIBID or equivalent.

Due to legal restrictions, cash balances held in Brazil, amounting to EUR 4.4 million (2005: EUR 2.3 million), are not available for general use by the Parent or other subsidiaries.

NOTE 29: EQUITY

The change in ordinary share capital is set out below:

in EUR million, except number of shares stated in units	Number of ordinary shares	Ordinary share capital
At 1 January 2005	5,530,260	160.0
Change	2	-
At 31 December 2005	5,530,262	160.0
Change	-	-
At 31 December 2006	5,530,262	160.0

All ordinary shares issued are fully paid. Ordinary shares have no face value. They are either nominative or bearer shares. Each ordinary share confers one voting right.

Treasury shares are held by the Parent and by subsidiaries as set out below:

in EUR million, except number of shares stated in units	2006		2005	
	Number	Amount	Number	Amount
Treasury shares held by the Parent	77,270	12.9	68,309	9.1
Treasury shares held by subsidiaries	1	-	1	-
Treasury shares held	77,271	12.9	68,310	9.1

Treasury shares are held to cover the stock option plans set up by the Parent in the period since 1999 (see note 37).

On 27 May 2004, the Extraordinary General Meeting of Shareholders authorised the Board of Directors to increase the share capital on one or more occasions, during a renewable period of five years, up to a maximum of EUR 60 million by contributions in cash or in kind or by incorporation of available or non-available reserves or share premium account, with or without creation of new shares, either preference or other shares, with or without voting rights, with or without subscription rights, with the possibility of limiting or withdrawing preferential subscription rights including in favour of one or more specified people.

In addition to ordinary shares, there are 500,000 nominative participating shares, which do not represent share capital. The number of participating shares remained unchanged in 2005 and in 2006. Each participating share confers one voting right and gives the right to a dividend equal to one eighth of the dividend of an ordinary share.

Registered shares not fully paid-up may not be transferred except by virtue of a special authorisation from the Board of Directors for each assignment and in favour of an assignee appointed by the Board (art. 7 of the Articles). Participating shares may not be transferred except by the agreement of a majority of members of the Board of Directors, in which case they must be transferred to an assignee appointed by said members (art. 8 of the Articles).

The Board of Directors proposed the distribution of a gross dividend amounting to EUR 2.64 per share (2005: EUR 2.40 per share), or EUR 14.6 million in aggregate (2005: EUR 13.3 million).

NOTE 30: PROVISIONS

Provisions for post-retirement benefit schemes are analysed in note 20. The other provisions, either current or non-current, are analysed below.

The major classes of provisions are the following ones:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Non-current provisions								
Dealer-related	21.3	-	-	21.3	18.0	-	-	18.0

Total provisions	35.4	64.6	54.8	154.8	30.4	52.3	25.6	108.3

NOTE 30: PROVISIONS (continued)

The changes in provisions are set out below for the year ended 31 December 2006:

in EUR million	Dealer-related	Warranty	Insurance	Other non-current items	Other current items	Total
At 1 January 2006	18.0	4.6	40.6	41.8	3.3	108.3
Charged in the year	9.8	0.9	26.1	40.1	5.9	82.8

Reversed in the year	-2.0	-0.1	-	-0.3	-	-2.4
Translation differences	-	-	0.1	-	-0.5	-0.4
At 31 December 2006	21.3	5.0	48.8	71.0	8.7	154.8

The timing of the outflows being largely uncertain, most of the provisions are considered as a non-current items. Current provisions are expected to be settled within 12 months.

The dealer-related provisions arise from the ongoing improvement of the distribution networks.

Warranty provisions relate to the cost of services offered to new vehicle customers, like mobility. Expected reimbursements by third parties amount to at least EUR 0.2 million (2005: EUR 0.2 million).

In the Car Rental segment, insurance reserves provide for uninsured losses under third party liabilities or claims. Due to the timescales and uncertainties involved in such claims, provision is made based upon the profile of claims experience, allowing for potential claims for a number of years after policy inception. In the Automobile Distribution segment, insurance reserves provide for incurred but not registered motor claims at D'leteren Lease.

Other non-current provisions primarily comprise:

- Reorganisation and employee termination provisions that are expected to crystallise within the next few years.
- Dilapidation and environmental provisions to cover the costs of the remediation of certain properties held under operating leases.
- Provisions for vacant properties.
- Provision against the future redemption of benefits under customer loyalty programmes.
- Provision against legal claims that arise in the normal course of business, that are expected to crystallise in the next couple of years. After taking appropriate legal advice, the outcome of these legal claims should not give rise to any significant loss beyond amounts provided at 31 December 2006.
- The provision for a long-term management incentive scheme set up in 2005 in the Vehicle Glass segment. The settlement of this scheme is expected to occur in 2010.

The Group issues bonds through its wholly-owned subsidiary D'Ieteren Trading b.v. The bonds outstanding at 31 December are as follows:

	2006				2005			
	Issued	Principal (in EUR million)	Maturing	Fixed rate	Issued	Principal (in EUR million)	Maturing	Fixed rate
	July 2004	100.0	2012	5.25%	July 2004	100.0	2012	5.25%

Total		200.0				200.0		

The weighted average cost of bonds in 2006 was 4.8% (2005: 5.0%).

The Group issues bonds under a securitisation programme, through its wholly-owned subsidiary s.a. D'Ieteren Lease n.v. ("D'Ieteren Lease"). The programme is set out in note 14. The bonds are rated A1. The spread payable over EURIBOR is 65 basis points. The weighted average cost of this programme, including the amortisation of the initial set-up costs over a 3-year period, was 4.3%. Pledged accounts related to this securitisation programme are recorded under the heading "other financial assets" (see note 25). Other disclosures regarding the securitisation programme are also provided in notes 19 and 39.

Obligations under finance leases are analysed below:

in EUR million	2006		2005	
	Minimum lease payments	Present value of minimum lease payments	Minimum lease payments	Present value of minimum lease payments
Within one year	292.7	286.8	283.0	279.7
Between one and five years	10.6	9.6	8.0	7.1

Less: future finance charges	-7.0	-	-4.3	-
Present value of finance lease obligations	297.2	-	287.6	-

NOTE 31: BORROWINGS (continued)

Obligations under finance leases are mainly located in the Car Rental segment, which leases certain of its vehicles (including some vehicles held under buy-back agreements) and some plant and equipment under finance leases. The average lease term is less than one year. For the year ended 31 December 2006 the average effective interest rate was 3.2% (2005: 3.0%) and interest rates are fixed at the contract date. All these finance leases are on a fixed repayment basis and no arrangements have been entered into for contingent rent payments. Finance leases are occasionally used in the Vehicle Glass segment, and not used in the Automobile Distribution segment. The Group's obligations under finance leases are secured by the lessors having legal title over the leased assets. In addition, collateral is held against certain of the leases in the Car Rental segment (see note 25).

Bank and other loans mainly represent non syndicated bank loans (in the Automobile Distribution segment) and syndicated arrangements (in the Car Rental and the Vehicle Glass segments), as well as overdrafts. Depending on the currency of the bank borrowings and the segment concerned, the weighted average cost ranged from 3.3% to 6.1% in 2006 (2005: 2.6% to 5.2%).

On 20 February 2006 Avis Europe plc entered into a new five year multicurrency Senior Revolving Credit Facility which terminates on 20 February 2011. This facility was provided by a syndicate of 14 banks. The facility provides for loan advances denominated in euro, pound sterling, or other such currencies as may be agreed upon with the lenders, for a total aggregate principal amount of EUR 580.0 million outstanding at any one time. The interest rates applicable to advances under the facility are based on EURIBOR (or LIBOR for drawings in currencies other than euro), plus a margin. No amounts were drawn at 31 December 2006 under this facility.

Loan notes mainly represent the following outstanding balances in the Car Rental segment, due by Avis Finance Company plc ("AFC"), an indirect wholly owned subsidiary of Avis Europe plc:

Issued	Currency	2006		2005	
		Principal (in million)	Maturing	Principal (in million)	Maturing
August 2000	USD	150.0	2007, 2010	150.0	2007, 2010
November 2001	EUR	-	-	25.0	2006
March 2002	EUR	25.0	2007	25.0	2007
June 2002	EUR	26.8	2012	26.8	2012
July 2002	EUR	120.0	2007	120.0	2007
June 2004	USD	240.0	2011, 2012, 2014	240.0	2011, 2012, 2014
June 2004	EUR	65.0	2012	65.0	2012
July 2006	EUR	250.0	2013	-	-

The USD loan notes bear interest at an average fixed rate of 6.8% (2005: 6.8%). The euro denominated loan notes bear interest at an average fixed rate of 6.0% (2005: 6.1%). In July 2006, AFC issued EUR 250.0 million Senior Floating Rate Notes due 2013 which bear interest at EURIBOR plus 2.625%. These notes reprice quarterly and include a two year call option, permitting AFC to repay the notes with effect from 31 July 2008. This option is separately recognised as an embedded derivative at fair value (see note 19).

The Group runs two commercial paper programmes in Belgium:

- s.a. D'Ieteren Treasury n.v., a wholly owned subsidiary of the Parent, runs a EUR 300.0 million (2005: EUR 300.0 million through s.a. D'Ieteren Services n.v.) programme guaranteed by the Parent. The weighted average cost over 2006 was 2.8% (2005: 2.3%). Medium term notes can also be drawn from this programme. The weighted average cost of these notes was nil in 2006 (2005: 4.5%).
- AFC runs a programme guaranteed by Avis Europe plc, which provides the Car Rental segment with borrowings of up to EUR 200.0 million (2005: EUR 200.0 million). Amounts drawn under the facility attract interest at a floating rate set by reference to EURIBOR plus a margin which will vary depending upon market conditions at the time of issue. The average rate applicable to the drawn facility at 31 December 2005 was 2.6%.

Deferred consideration represents amounts still due arising on the acquisition of Avis Europe Investment Holdings Limited (a wholly owned subsidiary of Avis Europe plc) from Avis Inc. in 1997, and payable in annual instalments of GBP 1.9 million including interest. The deferred consideration is denominated in GBP and bears an interest rate of 8.0% fixed for 31 years.

Inter-segment financing items are amounts lent by the Automobile Distribution segment to the Car Rental and Vehicle Glass segments, at arm's length conditions.

Current borrowings are due for settlement within one year.

Non-current borrowings are due for settlement after more than one year, in accordance with the maturity profile set out below:

in EUR million	2006	2005
Between one and five years	726.4	894.7
After more than five years	665.5	505.8
Non-current borrowings	1,391.9	1,400.5

NOTE 31: BORROWINGS (continued)

The exposure of the Group's borrowings to interest rate changes and the repricing dates (before the effect of the debt derivatives) at the balance sheet date are as follows:

in EUR million	2006	2005
Less than one year	1,213.8	1,124.0
Between one and five years	136.8	346.4
After more than five years	665.5	505.8
Borrowings	2,016.1	1,976.2

The interest rate and currency profiles of borrowings are as follows (including the value of the adjustment for hedged borrowings disclosed in note 32):

in EUR million	2006			2005		
	Fixed rate	Floating rate	Total	Fixed rate	Floating rate	Total
Currency						
EUR	441.0	1,085.5	1,526.5	418.2	1,004.0	1,422.2
GBP	33.5	81.6	115.1	33.8	135.4	169.2
USD	354.2	28.7	382.9	363.4	26.2	389.6
Other	3.2	45.2	48.4	2.8	46.5	49.3
Total	831.9	1,241.0	2,072.9	818.2	1,212.1	2,030.3

When the effects of debt derivatives are taken into account, the interest rate and currency profiles of borrowings are as follows:

in EUR million	2006			2005		
	Fixed rate	Floating rate	Total	Fixed rate	Floating rate	Total
Currency						
EUR	1,306.7	499.1	1,805.8	1,181.0	621.7	1,802.7
GBP	131.1	26.3	157.4	96.5	17.7	114.2
USD	3.9	24.9	28.8	2.9	26.1	29.0
Other	32.7	48.2	80.9	35.2	49.2	84.4
Total	1,474.4	598.5	2,072.9	1,315.6	714.7	2,030.3

The floating rate borrowings bear interest at various rates set with reference to the prevailing EURIBOR or equivalent. The range of interest rates applicable for fixed rate borrowings outstanding is as follows:

Currency	2006		2005	
	Min.	Max.	Min.	Max.
EUR	3.8%	6.8%	2.7%	6.8%
GBP	5.3%	5.9%	4.0%	6.7%
USD	5.4%	6.1%	8.5%	8.5%
Other	4.3%	5.0%	6.0%	8.0%

The fair value of current borrowings approximates to their carrying amount. The fair value of non-current borrowings is set out below:

in EUR million	2006		2005	
	Fair value	Carrying amount	Fair value	Carrying amount
Bonds	198.1	200.0	208.5	200.0
Bonds under securitisation programme	231.0	231.0	-	-
Obligations under finance leases	8.4	10.4	7.9	7.9
Bank loans, loan notes and other loans	870.9	917.8	1,187.8	1,159.9
Deferred consideration	35.5	32.7	34.7	32.7
Non-current borrowings	1,343.9	1,391.9	1,438.9	1,400.5

The fair value of the bonds is determined based on their market prices. The fair value of the bonds under securitisation programme is equal to their carrying amount. The fair value of the other borrowings is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

Certain of the borrowings in the Group have covenants attached.

NOTE 32: NET DEBT

Net debt is a non-GAAP measure, i.e. its definition is not addressed by IFRS. The Group does not represent net debt as an alternative to financial measures determined in accordance with IFRS. The Group uses the concept of net debt to reflect its indebtedness. Net debt is based on borrowings less cash, cash equivalents and current asset investments. It excludes the fair value of derivative debt instruments. The hedged borrowings (i.e. those that are accounted for in accordance with the hedge accounting rules of IAS 39) are translated at the contractual foreign exchange rates of the related cross currency swaps. The other borrowings are translated at closing foreign exchange rates.

in EUR million	31 December 2006				31 December 2005

NOTE 33: PUT OPTIONS GRANTED TO MINORITY SHAREHOLDERS

The Group is committed to acquiring the minority shareholdings owned by third parties in Belron, should these third parties wish to exercise their put options. IAS 32 requires that the exercise price of such options granted to minority interest (EUR 223.3 million at 31 December 2006, of which EUR 84.3 million of put options with related call options, exercisable until 2014, and EUR 139.0 million of put options with no related call options, exercisable until 2009) be reflected as a financial liability in the consolidated balance sheet. As of this moment, there remains some uncertainty regarding the treatment of the difference between the exercise price of the options and the carrying value of the minority interest that must be presented within financial liabilities (EUR 106.3 million at 31 December 2006). In the absence of guidance from IFRIC, the Group has chosen to present such differences as additional goodwill (EUR 117.0 million). This goodwill is adjusted at period end to reflect the change in the exercise price of the options and the carrying value of minority interest to which they relate. This treatment reflects the economic substance of the transaction, and has no impact on the result attributable to equity holders of the Parent.

The exercise price of the put options takes into account estimates of the future profitability of Belron. Should the underlying estimates change, the value of the put options recognised in the balance sheet (and of the related goodwill) would be impacted (this would however have no impact on the income statement under the accounting treatment currently applied).

NOTE 34: OTHER NON-CURRENT PAYABLES

Other non-current payables are non interest-bearing deferred consideration on acquisitions, payable after more than 12 months. The carrying value of other non-current payables approximates to their fair value.

NOTE 35: TRADE AND OTHER CURRENT PAYABLES

Trade and other payables are analysed below:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Trade payables	95.7	362.7	61.8	520.2	119.4	352.4	59.7	531.5

Trade and other payables	167.8	671.2	257.4	1,096.4	186.2	657.3	241.4	1,084.9

Trade and other current payables are expected to be settled within 12 months. The carrying value of trade and other current payables approximates to their fair value.

NOTE 36: EMPLOYEE BENEFIT EXPENSE

The employee benefit expense is analysed below:

in EUR million	2006				2005			
	Automobile Distribution	Car Rental	Vehicle Glass	Group	Automobile Distribution	Car Rental	Vehicle Glass	Group
Retirement benefit charges under defined contribution schemes	-4.0	-4.4	-9.2	-17.6	-3.1	-3.9	-9.7	-16.7

The above expense does not include the amounts charged during the period relating to the long-term management incentive scheme mentioned in note 30.

The staff numbers are set out below (average full time equivalents):

	2006	2005
Automobile Distribution	1,571	1,505
Car Rental	6,276	6,253
Vehicle Glass	12,731	10,932
Group	20,578	18,690

NOTE 37: SHARE-BASED PAYMENTS

There are in the Group two kinds of equity-settled share-based payment schemes:

- Since 1999, share option schemes have been granted to officers and managers of the Automobile Distribution segment, in the framework of the Belgian law of 26 March 1999. The underlying share is the ordinary share of s.a. D'leteren n.v.
- Since 1997, several share option schemes, an equity partnership plan, a performance share plan and a share retention plan have been granted to certain categories of employees in the Car Rental segment. The underlying share is the ordinary share of Avis Europe plc.

Automobile Distribution Segment

Options outstanding are as follows:

Date of grant	Number of options (in units)		Exercise price (in EUR)	Exercise period	
	2006	2005		From	To
2006	8,315	-	266.0	1/1/2010	27/11/2016
2005	11,710	12,210	209.0	1/1/2009	6/11/2015
2004	9,035	9,035	142.0	1/1/2008	28/11/2014
2003	12,805	12,805	163.4	1/1/2007	16/11/2013
2002	9,830	17,480	116.0	1/1/2006	13/10/2015
2001	8,245	13,475	133.0	1/1/2005	25/10/2014
2000	14,800	14,770	267.0	1/1/2004	25/9/2013
1999	11,735	11,710	375.0	1/1/2003	17/10/2012
Total	86,475	91,485			

A high proportion of outstanding options is covered by treasury shares (see note 29).

NOTE 37: SHARE-BASED PAYMENTS (continued)

A reconciliation of the movements in the number of outstanding options during the year is as follows:

	Number (in units)		Weighted average exercise price (in EUR)	
	2006	2005	2006	2005
Outstanding options at the beginning of the period	91,485	86,580	197.6	190.6
Granted during the period	8,315	12,210	266.0	209.0
Forfeited during the period	-	-30	-	267.0
Exercised during the period	-13,380	-7,295	125.5	133.0
Other movements during the period	55	20	159.4	129.0
Outstanding options at the end of the period	86,475	91,485	215.4	197.6
of which: exercisable at the end of the period	44,610	39,955	237.4	253.5

In 2006, two third of the options were exercised during the second half of the period. The average share price during the period was EUR 250.9 (2005: EUR 185.3).

For share options outstanding at the end of the period, the weighted average remaining contractual life is as follows:

	Number of years
31 December 2006	7.7
31 December 2005	8.6

IFRS 2 "Share-Based Payment" requires that the fair value of all share options issued after 7 November 2002 is charged to the income statement. The fair value of the options must be assessed on the date of each issue. A simple Cox valuation model was used at each issue date re-assessing the input assumptions on each occasion. The assumptions for the 2006 and 2005 issues were as follows:

	2006	2005
Number of employees	140	168
Spot share price (in EUR)	270.1	227.0
Option exercise price (in EUR)	266.0	209.0
Vesting period (in years)	3.0	3.0
Expected life (in years)	6.9	6.8
Expected volatility (in %)	17%	20%
Risk free rate of return (in %)	4.18%	3.47%
Expected dividend (in EUR)	2.50	2.32
Probability of ceasing employment before vesting (in %)	-	-
Weighted average fair value per option (in EUR)	83.5	74.4

Expected volatility and expected dividends were provided by an independent expert. The risk free rate of return is based upon EUR zero-coupon rates with an equivalent term to the options granted.

Car Rental Segment

The share option schemes of the Car Rental segment might have a dilutive impact on the Group's shareholding in Avis Europe plc. The total number of share options in issue at 31 December 2006 is 7,093,000 (2005: 9,211,300). This represents 0.8% (2005: 1.0%) of Avis Europe plc share capital. These share options can be exercised until 2014 (2005: 2014). Details on these share option schemes are provided in Avis Europe's annual report.

NOTE 38: RISKS RELATED TO FINANCIAL INSTRUMENTS

Treasury policies aim to ensure permanent access to sufficient liquidity, and to monitor and limit interest and currency exchange risks.

To minimise liquidity risk, each of the Group's three businesses ensures, on the basis of long-term financial projections, that it has a core level of committed long-term funding in place, with maturities spread over a wide range of dates, supplemented by various shorter-term, usually uncommitted, facilities.

NOTE 38: RISKS RELATED TO FINANCIAL INSTRUMENTS (continued)

To mitigate interest and currency risks, tradable derivatives may be used, such as interest rate and foreign exchange swaps, forward rate agreements, foreign exchange forward contracts or options. Transactions are only undertaken with counterparties of strong credit quality and must be related to existing or highly probable exposures.

Credit risk on trade and other receivables is mitigated both by the selection of counterparties based on credit quality, and their diversity. Certain receivables are also credit insured.

There is no meaningful price risk other than those mentioned above.

Within this framework, considerable autonomy is granted to each of the three businesses.

NOTE 39: CONTINGENCIES AND COMMITMENTS

in EUR million	2006	2005
Commitments to acquisition of non-current assets	50.1	166.8
Other important commitments:		
Commitments given	41.6	29.9
Commitments received	5.5	12.0

The commitments to acquisition of non-current assets mainly concern the vehicle fleet of the Car Rental segment.

The Group is a lessee in a number of operating leases. The related future minimum lease payments under non-cancellable operating leases, per maturity, are as follows:

in EUR million	2006	2005
Within one year	137.1	86.0
Later than one year and less than five years	201.7	180.1
After five years	107.8	48.2
Total	446.6	314.3

At each year end, the Group also had prepaid various other operating lease commitments in relation to vehicles purchased under buy-back agreements, included in vehicle related receivables in note 27.

The Group also acts as a lessor in a number of operating leases, mainly through its wholly-owned subsidiary s.a. D'Ieteren Lease n.v. The related future minimum lease payments under non-cancellable operating leases, per maturity, is as follows:

in EUR million	2006				2005			
	Investment property	Vehicles	Other property, plant and equipment	Total	Investment property	Vehicles	Other property, plant and equipment	Total
Within one year	-	70.9	-	70.9	0.3	64.1	-	64.4
Later than one year and less than five years	0.6	98.4	-	99.0	0.4	90.7	-	91.1
After five years	0.5	-	-	0.5	0.1	-	-	0.1
Total	1.1	169.3	-	170.4	0.8	154.8	-	155.6

At each year end, the Group also had prepaid various other operating lease commitments in relation to vehicles sold under buy-back agreements, included in deferred income in note 35.

The revenue, expenses, rights and obligations arising from leasing arrangements regarding investment property are not considered material to the Group, and accordingly a general description of these leasing arrangements is not disclosed.

Under the securitisation programme (see notes 14, 19, 25, 31), D'Ieteren Lease granted a floating charge on its business to the bondholders to secure its obligations. The floating charge was granted for up to the following amounts:

- in respect of principal: EUR 324.0 million;
- three years of interest calculated at the rate of 5%, or such other rate as may be agreed between the parties.

Etablissementen Verellen n.v., a wholly owned subsidiary of the Group, granted a floating charge on its business to its creditors to secure its obligations. The floating charge was granted for up to EUR 0.6 million.

NOTE 41: SUBSEQUENT EVENTS

Automobile Distribution

On 4 January 2007, the Automobile Distribution segment acquired a 100% interest in Kronos Management s.a. and Kronos Automobiles s.a. (collectively "Kronos"), which operate a garage distributing the make Porsche in Gembloux, Belgium. The provisional fair value of the net assets acquired amounted to EUR 1.3 million, after fair value adjustments of EUR 1.0 million. The consideration, satisfied by a cash payment, amounted to EUR 3.7 million. The goodwill arising from this acquisition is currently estimated at EUR 2.4 million. After elimination of inter-company transactions, the additional sales arising from this acquisition will be marginal, while the additional result is not expected to be material to the Group and accordingly is not disclosed separately.

Vehicle Glass

D'Ieteren announced on 6 February 2007 that Belron has signed an agreement to acquire, subject to local regulatory approval and other customary closing conditions, Safelite Group, Inc., the US leader in the vehicle glass repair and replacement ("VGRR") market, for an enterprise value of USD 334 million (EUR 258 million), including assumed debt.

This acquisition will be entirely financed by Belron through the issuance of new debt instruments, on its own financing capacity. Based on estimated 2006 results of Safelite, this acquisition would have resulted in an increase of EUR 8 million of the current PBT, Group's share (as defined in note 9), of D'Ieteren on a pro-forma 2006 full year basis.

The transaction is expected to close in March 2007, and the integration of Belron Inc., the current US subsidiary of Belron, and Safelite operations would begin at that time.

After year-end, Belron negotiated a new EUR 750 million underwritten facility agreement to ensure adequate future funding for strategic initiatives and the immediate funding requirement for the acquisition of Safelite. The EUR 750 million facilities are divided into a 5 year multicurrency revolving facility of EUR 500 million and a EUR 250 million, 364 day short-term facility with a further 364 day term out option. It is Belron's intention to refinance this short-term facility via a US private placement in the forthcoming months. This will achieve an appropriate mix for Belron between long-term core borrowing and shorter term revolving debt together with a diversification of its lender base.

NOTE 42: LIST OF SUBSIDIARIES, ASSOCIATES AND JOINT VENTURES

The full list of companies concerned by articles 114 and 165 of the Royal Decree of 30 January 2001 implementing the Company Code will be lodged with the Central Balance Sheet department of the National Bank of Belgium. It is also available on request from the Parent head office (see note 1).

The main fully consolidated subsidiaries of the Parent are listed below:

NOTE 43: EXCHANGE RATES

Monthly income statements of foreign operations are translated at the relevant rate of exchange for that month. Except for the balance sheet which is translated at the closing rate, each line item in these consolidated financial statements represents a weighted average rate.

The main exchange rates used for the translations were as follows:

Number of euros for one unit of foreign currency	2006	2005
Closing rate		
AUD	0.59	0.62
BRL	0.35	0.37
CAD	0.66	0.72

BRL	0.37	0.33
CAD	0.70	0.67
GBP ⁽²⁾	1.43	1.46
USD	0.80	0.81

(1) Effective average rate for the profit or loss attributable to equity holders.

(2) Both the Car Rental segment and the Vehicle Glass segment have significant operations in GBP. The average presented is the average of the Car Rental average rate (1.38 at 31 December 2006; 1.45 at 31 December 2005) and of the Vehicle Glass average rate (1.47 at 31 December 2006; 1.46 at 31 December 2005).

SUMMARY OF ACCOUNTING POLICIES

The **capitalised costs for the development of information technology projects (intangible assets)** are amortised on a straight-line basis over their useful life. The amortisation period cannot be less than 2 years nor higher than 7 years.

Tangible Fixed Assets are recognised at their acquisition value; this value does not include borrowing costs. Assets held by virtue of long-term leases ("emphytéose"), finance leases or similar rights are entered at their capital reconstitution cost. The rates of depreciation for fixed assets depend on the probable economic lifetime for the assets concerned. As from the 1st of January 2003, tangible fixed assets acquired or constructed after this date shall be depreciated pro rata temporis and the ancillary costs shall be depreciated at the same rate as the tangible fixed assets to which they relate.

The main depreciation rates are the following:

	Rate	Method
Buildings	5%	L/D
Building improvements	10%	L/D
Warehouse and garage	15%	L/D
Network identification equipment	20%	L/D
Furniture	10%	L/D
Office equipment	20%	L/D
Rolling stock	25%	L
Heating system	10%	L/D
EDP hardware	20%-33%	L/D

L: straight-line.

D: declining balance (at a rate twice as high as the equivalent straight-line rate).

Tangible fixed assets are revalued if they represent a definite, long-term capital gain. Depreciation of any revaluation surplus is calculated linearly over the remaining lifetime in terms of the depreciation period of the asset concerned.

Financial Fixed Assets are entered either at their acquisition price, after deduction of the uncalled amounts (in the case of shareholdings), or at their nominal value (amounts receivable). They can be revalued, and are written down if they suffer a capital loss or a justifiable long-term loss in value. The ancillary costs are charged to the income statement during the financial year.

Amounts Receivable within one year and those receivable after one year are recorded at their nominal value. Write-downs are applied if repayment by the due date is uncertain or compromised in whole or in part, or if the repayment value at the closing date is less than the book value.

Stocks of new vehicles are valued at their individual acquisition price. Other categories of stocks are valued at their acquisition price according to the fifo method, the weighted average price or the individual acquisition price. Write-downs are applied as appropriate, according to the selling price or the market value.

Treasury Investments and Cash at Bank and in Hand are recorded at their acquisition value. They are written down if their realisation value on the closing date of the financial year is less than their acquisition value.

When these treasury investments consist of own shares held for hedging share options, additional write-downs are applied if the exercise price is less than the book value resulting from the above paragraph.

Provisions for Liabilities and Charges are subject to individual valuation, taking into account any foreseeable risks. They are written back by the appropriate amount at the end of the financial year if they exceed the current assessment of the risks which they were set aside to cover.

Amounts Payable are recorded at their nominal value.

Valuation of Assets and Liabilities in Foreign Currencies

Financial fixed assets are valued in accordance with recommendation 152/4 by the Accounting Standards Commission. Stocks are valued at their historical cost. However, the market value (as defined by the average rate on the closing date of the balance sheet) is applied if this is less than the historical cost. Monetary items and commitments are valued at the official rate on the closing date, or at the contractual rate in the case of specific hedging operations. Only negative differences for each currency are entered in the income statement.
